

MOTION BY SUPERVISOR DON KNABE

November 1, 2005

Two independent reports were released in the past week that offered a negative assessment of conditions in the County of Los Angeles in two important service areas. In the first report, the American Society of Civil Engineers suggested the County of Los Angeles will require over \$50 billion in infrastructure improvements within the next five years.

In the second report, Heal the Bay reported that over the summer, beaches along the Los Angeles County coastline posted the poorest water quality conditions in the past five years of measurements.

I, THEREFORE, MOVE, that the Board of Supervisors instruct the Director of Beaches and Harbors to review the results reported by Heal the Bay and instruct the Director of Public Works to review the results reported by the American Society of Civil Engineers.
